

# MAKE GOTHAM CLEAN AGAIN

DRONES USED, TRASH REMOVED

## Citizens information note

Dear citizens,

We are aware that the drone application requiered by Gotham City Hall worries you a lot.  
That's why we want to reassure you about this :

Drones will never be used to monitor citizens.  
We take the side of the privacy so we ensured that the artificial intelligence used to process the images only recognizes the waste.

Its utility is above all to relieve the citizens in the task of reporting garbage in order to live in a sweat and clean city.

Obviously we will listen your feedback on this tool.

We want to be totally transparent with you, in this sense, you will also find in this letter the deployment plan of the drones.

Best regards,  
Gotham City Hall

e.g : what you see

what drone see
